

Q1  
CATALOG SYSTEM", and Docket No. GDT1P004, U.S. Application No.  
09/625,745 filed on the same day, and entitled "METHODS OF CAPTURING  
CATALOG DATA".

IN THE CLAIMS

Please **amend** the following claims:

A2  
Sub B7  
1. (amended) A method of distributing data for use in a catalog, comprising:  
capturing product data for a product according to a data model, the data model  
having one or more classes, each one of the one or more classes being defined by one  
or more categories, each of the one or more categories being defined by an attribute  
group having one or more attributes;

storing the product data, the product data including both a manufacturer SKU  
that identifies the product and a customer SKU that identifies the product, wherein the  
stored product data is suitable for use in an electronic catalog.

2. (amended) A method of maintaining catalog data stored in a system product data  
file, comprising:

receiving a customer product portfolio file, the customer product portfolio file  
including at least one SKU associated with each product for which data is requested;

mapping the customer product portfolio file to the system product data file  
such that each product identified in the customer product portfolio file that is not in  
the system product data file is identified;

capturing data for the product that is not in the system product data file; and  
adding the captured data for the product to the system product data file.

A3  
Sub B7  
13. (amended) A method of maintaining catalog data stored in a system product data  
file, comprising:
